## UNDERWATER LUX-METER

## HANDHELD LUX-METER 3876 UNDERWATER SENSOR

Handheld Underwater Lux-Meter for Aquaculture Fresh-water Farming, Hatcheries, Seawater Farming, rivers and laboratory use.

Datalogging 250 sets of measurements, RS232 serial interface for PC or Remote Display. The Hand Instrument incorporates the newest microprocessor technology thus using extremely low energy offering a 200-300 hours battery life-time.

The Underwater Lux-Sensor are supplied with 10m or 35m cable with meter marks. Other cable lengths on request.

Other Light-measurement application areas\*:

- Photosynthesis measurements
- Measuring UV-radiation
- Room lux-measurement

\* Other sensors available on request

### Specifications:

Measuring range: 0 lx – 300 klx  
Resolution: 0,1 lx – 100 lx  
Accuracy: +/- (3% FS + 1 digit)  
Connection: DIN connector  
Cable lengths: 10 & 35 m cable with deptmarks  
Datalog: 250 sets of measurements  
Weight: 0,3 kg (incl. battery)  
Dim.: 210x90x35mm
